

STIK ADHESIVE TAPE

HIGH ADHESION STRENGTH TAPE WITH
SUPERIOR AGEING AND WEATHERABILITY
PERFORMANCE

■ TECHNICAL SPECIFICATION

Single-sided tape. High adhesion strength and very high tack combined with superior ageing and weatherability performance. Excellent adhesion to a very wide range of surfaces. Excellent properties at low temperatures.

■ USE AND STORAGE

The functionality and efficiency of the adhesive material is guaranteed 12 months from the date of delivery. We recommend to store it respecting the following indications:

- Environmental Temperature from + 15 °C to + 22 °C
 - Humidity less than 65%
 - Avoid exposing the material to direct light and sources of heat
 - Store the material in the original packaging and remove the packaging only before use
- Before applying the adhesive tape, the surface must be clean and dry.
In case of particular processing it is advisable to evaluate the suitability of the product by means of a preliminary test.

Thickness (carrier + adhesive)	300 µm
Length	25 m
Width	60 mm

Peel Adhesion	30 N/25mm
Min. working temperature	- 40 °C
Max. working temperature	+ 80 °C
